

# Nobles Railways Industry Company

Nobles Railways Industry Company was established to bring a fresh approach and new dimension into Sudanese and African railway industries and implement new technologies and standards since the international market requires the construction and rehabilitation of current railways lines.

## Mission

to bring a fresh approach and new dimension into Sudanese and African railway industries

## Vision

To cater to top industry players by providing dedicated top tier services.

## Objectives

To provide a full range of railway services with the highest level of quality and technology.

## Technical Capabilities

Nobles Railways Industry Co. has a flexible infrastructure, with sufficient and efficient resources, specialized professionals, and skilled workers, with alliances already in place to design and implement the best solutions required by the railway industry.

Some of the Specialised Machinery that we use:

- Diesel-powered Maintenance Railway car
- Mobile Flash Butt rail welding machine

- Concrete plank production facility
- Highly skilled team of technicians and engineers
- Track Renewal Systems
- Diggers, Loaders, and Rail movers.

## Company Achievements:

In short amount of time Nobles Railways Industry has become the leading railway services company in Sudan. This is due to our dedication to advancing the railservices specifically in Sudan and Africa as a whole. We have been able to renovate and lay down over 500km of railroad all over Sudan, linking vital production centers to Port Sudan where the folow of exports provides a steady stream of income supporting national economy.

## Some Featured projects:

- Khartoum - Atbara railway line with a length of 313km. All Components were provided and instaled by nobles railway. This was not simple a renovation as everything in the line was replaced.
- Babanusa - Abu Jabra railway line spanning 130km, running parallel to the old line with completely new parts.
- Atbara - Port Sudan railway line spanning 503km. The project required the replacement of all rails as well as installing new concrete planks. This is considered one of the major achievements in the railway industry in Sudan.
- Khartoum State passenger trains project. This was executed in partnership with the Khartoum State Government and the Naitional Railway Authority to provide a solution to public transport shortages in the capital. Nobles Railways has implemented all the infrastructure for the project as well as providing the railway engines and passenger cars.
